IDENTIFIERS	*Staffing Ratio

ABSTRACT

This report on school staffing ratios is prepared from information collected as part of Educational Research Service's "National Survey of Salaries and Wages in Public Schools, 1987-88," which provides data on salaries, wages, and number of staff for 22 professional and 10 support positions. Included are pupil-staff and teacher-staff ratios for individual positions and aggregate categories of professional personnel. Data for these categories are presented separately for large, medium, small, and very small school systems and for five levels of pupil expenditure of the reporting school systems. Two summary tables show the mean number of pupils and the mean number of teachers per professional and per administrative staff member in the 1,728 (57 percent) reporting systems; 23 tables provide data summarizing the number of pupils and the number of teachers per professional and administrative staff member classified by 4 enrollment groups; and 20 tables classify the pupil-staff and teacher-staff ratio categories both by per pupil expenditure and by enrollment group.
